DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-18, 20-28, and 31-38 are rejected under 35 U.S.C. 102(b) as being unpatentable over Balakrishnan (U.S. 5,566,208).

Balakrishnan discloses a system and method for achieving simultaneous media play-out in a network comprising:

A server having a network (fig.3) connection port to supply a media stream at a first bitrate (R), the server determining network delivery requirements, including client buffering capabilities, and in response, modifying the supply of the media stream; and at least one client having a network connection port to receive the media stream and to transmit buffering capacities to the server; (col.3, line 58-col.4, line 35)

wherein the server determines the network delivery requirements in response to determining media streaming disruptions; (col.3, line 58-col.4, line 35)

wherein the server determines the first minimum client buffering capacity; (Rcol.5, line 8-col.6, line 34)

Application/Control Number: 09/944,012

Art Unit: 2143

wherein the server polls the clients for their respective buffering capacities; wherein each client transmits their buffering capacity to the server in response to the poll;

wherein the server determines the first minimum buffering capacity (R_{1-m1}) to be equal to the client with the smallest buffering capacity; (col.7, lines 35-65) wherein each client scheduling the playout to be at a time equal to a first time interval plus the minimum buffering capacity divided by the first bit-rate; (col.7, lines 1-35)

wherein the server, prior to supplying a media stream at the first bitrate, communicates the first minimum buffering capacity to the clients; (col.7, lines 1-35).

a change in the number of client, following the supplying of media stream at a first bitrate; and, wherein the server determines the new minimum client buffering capacity, in response to the change in the number of clients, and modifies the supply of media stream in response to the new minimum buffering capacity; (col.6, lines 34-60)

wherein the server modifies the supply of the media stream by temporarily pausing the supply of the media stream at the first bitrate, and temporarily increasing the media stream bitrate; (col.3, line 5; "These systems are desirable because it is generally better to allow the transmission bandwidth allotted to existing active communication links or channels in a network to be degraded (i.e., continue at a reduced bandwidth) when necessary rather than have some of them terminated. Also, much more

Application/Control Number: 09/944,012

Art Unit: 2143

sophisticated network management can be implemented if the bandwidth (i.e., <u>bit-rate</u> allotted to each link or channel) can be increased and decreased.")

Allowable Subject Matter

3. Claims 19 and 29-30 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

4. Applicant's arguments with respect to claims 1-38 have been considered but are most in view of the new ground(s) of rejection.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Application/Control Number: 09/944,012

Art Unit: 2143

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later

than SIX MONTHS from the date of this final action.

6. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Jeffrey C. Pwu whose telephone number is 571-272-

6798.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, David Wiley can be reached on 571-272-3923. The fax phone number for

the organization where this application or proceeding is assigned is 703-872-9306.
